What is claimed is:

An isolated nucleic acid molecule comprising the nucleotide sequence of SEQ ID
NO:4 or SEQ ID NO: 5 wherein said nucleic acid molecule is less than 1000 nucleotides in length.

- 2. The isolated nucleic acid molecule of claim 1, wherein said nucleic acid molecule is less than 800 nucleotides in length.
- 3. The isolated nucleic acid molecule of claim 1, wherein said nucleic acid molecule is less than 750 nucleotides in length.
- 4. The isolated nucleic acid molecule of claim 1, wherein said nucleic acid molecule is less than 600 nucleotides in length.
- 5. An isolated nucleic acid molecule consisting of the nucleotide sequence of SEQ ID NO:4 or fragment thereof.
- 6. An isolated nucleic acid molecule consisting of the nucleotide sequence of SEQ ID NO:5 or fragment thereof.
- 7. The isolated nucleic acid molecule of any one of claims 1-6, wherein said sequence regulates transcription of an operably linked nucleotide sequence of interest.
- 8. The isolated nucleic acid molecule of claim 7, wherein said sequence regulates transcription by inducing expression in response to a stimulus.
- 9. The isolated nucleic acid molecule of claim 8, wherein said stimulus is light or an environmental stress.

10. A isolated nucleic acid construct comprising, a promoter sequence comprising the nucleic acid sequence of SEQ ID NO: 4 or 5 or fragment thereof operably linked to a nucleotide sequence encoding a heterologous gene, wherein said heterologous gene encodes a protein of interest or fragment thereof.

- 11. The construct of claim 10, wherein said construct comprises at least two promoter sequences.
- 12. The construct of claim 11, further comprising a spacer sequence, wherein said spacer sequence operably links said promoter sequences.
- 13. The construct of claim 10, further comprising a nucleic acid encoding a selectable marker.
- 14. The construct of claim 10, further comprising a nucleic acid encoding a reporter gene.
- 15. The construct of claim 10, wherein said heterologous gene is capable of altering an agronomic trait.
- 16. The construct if claim 15, wherein said agronomic trait is disease resistance, herbicide resistance, environmental stress resistance, enhanced growth, or increased yield.
- 17. The construct of claim 10, wherein said heterologous gene is a plant gene.
- 18. The construct of claim 10, wherein said heterologous gene is a structural gene.
- 19. The construct of claim 18, wherein said structural gene is an enzyme, a transcriptional regulator, a chaperonin protein or a scaffolding protein.

20. The construct of claim 19, wherein said enzyme is farnesyl transferase alpha, farnesyl transferase beta or CaaX prenyl protease.

- 21. A isolated nucleic acid construct comprising, a promoter sequence comprising SEQ ID NO: 4 or 5 or fragment thereof operably linked to a non-translatable mRNA molecule of a gene encoding a protein of interest.
- 22. The construct of claim 21, wherein said non-translated mRNA molecule is an antisense nucleic acid, a hairpin RNA or a microRNA.
- 23. The construct of claim 21, further comprising a nucleic acid encoding a selectable marker.
- 24. The construct of claim 21, further comprising a nucleic acid encoding a reporter gene.
- 25. The construct of claim 21, wherein said gene is capable of altering an agronomic trait.
- 26. The construct if claim 25, wherein said agronomic trait is disease resistance, herbicide resistance, environmental stress resistance, enhanced growth or increased yield.
- 27. The construct of claim 21, wherein said gene is a plant gene.
- 28. The construct of claim 21, wherein said gene is a structural gene.
- 29. The construct of claim 28, wherein said structural gene is an enzyme, a transcriptional regulator, a chaperonin protein or a scaffolding protein.

30. The construct of claim 29, wherein said enzyme is farnesyl transferase alpha, farnesyl transferase beta or CaaX prenyl protease.

- 31. A vector comprising the nucleic acid molecule of any one of claims 1-9.
- 32. A cell comprising the vector of claim 31.
- 33. The cell of claim 32, wherein said cell is a plant cell.
- 34. The cell of claim 33, wherein said plant cell is monocotyledonous.
- 35. The cell of claim 33, wherein said plant cell is dicotyledonous.
- 36. A vector comprising the nucleic acid construct of any one of claims 10-20.
- 37. A cell comprising the vector of claim 36.
- 38. The cell of claim 37, wherein said cell is a plant cell.
- 39. The cell of claim 38, wherein said plant cell monocotyledonous.
- 40. The cell of claim 38, wherein said plant cell is dicotyledonous.
- 41. A vector comprising the nucleic acid construct of any one of claims 21-30.
- 42. A cell comprising the vector of claim 41.
- 43. The cell of claim 42, wherein said cell is a plant cell.
- 44. The cell of claim 43, wherein said plant cell monocotyledonous.

- 45. The cell of claim 43, wherein said plant cell is dicotyledonous.
- 46. A method of producing a transgenic plant comprising introducing into a plant cell the vector of claim 36, to generate a transgenic cell and regenerating a transgenic plant from said transgenic cell, wherein said transgenic plant expresses said protein of interest.
- 47. The method of claim 46, wherein said expression is constitutive.
- 48. The method of claim 46, wherein said expression is inducible
- 49. The method of claim 46, wherein said plant cell is monocotyledonous.
- 50. The method of claim 46, wherein said plant cell is dicotyledonous.
- 51. A method of producing a transgenic plant comprising introducing into a plant cell the vector of claim 41, to generate a transgenic cell and regenerating a transgenic plant from said transgenic cell, wherein said transgenic plant expresses said protein of interest at a decreased level as compared to a wildtype plant
- 52. The method of claim 51, wherein said plant cell is monocotyledonous.
- 53. The method of claim 51, wherein said plant cell is dicotyledonous.
- 54. The transgenic plant produced by any one of the methods of claims 46-50.
- 55. The seed produced by the transgenic plant of claim 54, wherein said seed produces a plant that expresses said protein of interest.
- 56. The transgenic plant produced by any one of the methods of claims 51-53.

57. The seed produced by the transgenic plant of claim 56, wherein said seed produces a plant that expresses said protein of interest at a decreased level as compared to a wildtype plant.

- 58. A method of expressing a heterologous protein comprising introducing to a cell the construct of any one of claims 10-20 and expressing said heterologous protein in said cell.
- 59. The method of claim 58, wherein said cell is a plant cell.
- 60. The method of claim 59, wherein said plant cell is monocotyledonous.
- 61. The method of claim 59, wherein said plant cell is dicotyledonous.
